How you can use www.411US.info

For yourself and your employees:

Go to www.411US.info, and enter your zip code in the box in the upper right.

It will make your local information available. (The online version of your local Newspapers, TV Stations, TV listings, weather, even what's showing at local movies.)

You can go to the National information on the left and find national news, opinion, sports, weather,

reviews, etc.

The best of the best.

For many metropolitan areas, another way to get to your local website is by typing in www.411YourCity.info. For example, www.411Denver.info, or www.411Redmond.info.

(Occasionally, an abbreviation might be used. For example, www.411LA.info or www.411SD.info.)

In any event, going to 411US.info and entering your zip code will bring your local information for you.

Changing the zipcode as you or your employees travel will assist you in finding your way around by getting news, weather, and maps in your visiting area.

While on the road, vacationing or on business, entering your home zipcode will let you keep up with news from home.

At home, the site let's you *fly* through getting information - broadly, quickly in executive summary fashion.

For your customers and clients:

Linking to www.411US.info (or www.411Denver.info for example) from your own website can give your clients helpful information (for example for realtors and their clients), and can add usefulness and value to your own website.

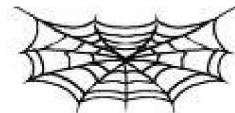

It's pretty cool. It's useful. It's free. Enjoy.
